

Practical Tips for Parenting: Equipping Families for Positive Living

Home is the place where love begins, where we find agreement and purpose, and where we build character. Our children learn about their world through watching and imitating us. What we give them passes from generation to generation. By the time you finish this book, you will have keys to establish and practice positive experiences within your home: keys for the ever-increasing flow of love in your home; keys for enhancing good self-esteem in your children; keys for expressing feelings responsibly; keys for fostering conversation with your family; keys for listening well; keys for smoothing out the bumps in family life; and keys for family cooperation - responsibility, respect, rules, and family meetings.
