

Otot Ha-Shamayim: Samuel Ibn Tibbons Hebrew Version of Aristotles Meteorology : A Critical Edition (Aristoteles Semitico-Latinus, Vol 8)

This volume makes available to the scholarly world the Otot ha-Shamayim, Samuel Ibn Tibbons Hebrew version of Aristotles Meteorology, completed in 1210. This treatise, based on the Arabic paraphrase of the Meteorology by Ibn al-Bitriq, was the first Aristotelian work to be translated into Hebrew. As it contains quotations from the lost Arabic translation of Alexander of Aphrodisias commentary on the Meteorology and from Ibn Rushds commentary, it provides a more complete picture of Aristotles text than the Arabic paraphrase. The present volume contains a critical edition of Ibn Tibbons text as well as an English translation and an extensive introduction. In addition to contributing to our knowledge of the history of the transmission of the Aristotelian text, the present book is of major importance for the study of medieval Jewish philosophy.
